Preface

Preface:  
On the Nature  
of and the  
Engagement  
with This Book

P.0 Book, *Consume Digest Produce: On the Nature of American Consumption/Digestion/Production of Information* was produced in 2019 by Chinese-American designer and artist, Stefanie Tam (b. 1997) in conjunction with website, *consumedigestproduce.us*, and installation, “*that-i.do/not\_think?I=know\_what&I\_do\_not=know*” (2019).

The digital space is inundated with information, advertisements, cookies, news articles, algorithmic based feeds, personal status updates, and dog videos; as it continues to grow and evolve at

an unpredictable rate, concerns of privacy, misuse of personal data, exploitation and persuasion of political beliefs, and the unregulated access to and production of content have become increasingly urgent topics.

I find myself having more questions than answers (I do not have answers nor am I a proponent for explicit answers):

P. 0.1 What would the world look like if Mark Zuckerberg, Jeff Bezos, Steve Jobs, Sundar Pichai—to name a few—knew what Facebook, Amazon, Apple, and Google

8

P.0

9

P.0

would be today at the start of their companies? Would they still have chosen to pursue their paths?

P. 0.2 The largest and most commonly visited websites are driven by capital. How, as a user, am I directly being influenced by the structural design of these websites? And how am I by those that aren’t driven by capital or an agenda?

P. 0.3 How would the culture of consumption and production change if words such as “curiosity” and “innova-

tion” rigidly held negative connotations? And if those such as “skepticism” and “caution” rigidly held positive connotations?

P. 0.4 How would belief systems shift if information being consumed was not algorithmically driven nor biased?

P. 0.5 Where quick-to-develop online communities flourish from shared values and beliefs, what acts as a separation of belief and truth?

P. 0.6 Where the ability to consume, digest, and produce

(via internet) is uncontrolled and exponentially quick to evolve, is there a way to more actively form the space we occupy as the space simultaneously forms us?

P. 0.7 What incites change? Is there a way to detect when change is necessary and/or self indulgent and /or hypocritical?

P. 0.8 What purpose does asking these questions have? I'm not entirely sure, but I have many. I suggest you ask some too.

Through the lens of the words, "CONSUME", "DIGEST", and "PRODUCE", I view the nature of human interaction with today's physical and digital space. This process is to gain a better understanding of confusion, multiplicity, and contradiction as opposed to arriving at explicit explanations as to why things are the way they are.

This book specifically looks at the nature of the relationship between the three selected words. While they are separable for clarity's sake, there is neither an explicit beginning, middle, and end, nor is there a distinct differ-

11 entiation between these words.

Over the course of this book, I collect 1) quotations from proponents and opponents of today's digital consumerist culture and statistics of media consumption, digestion, and production 2) figures of data visualization about media consumption, digestion, and production and 3) the images used as learning reinforcement for peoples' online assertions about digital consumption, digestion, and production. The following page includes some helpful guidelines and loose rules to assist the reader in navigating and engaging with the

content that follows.

As an attempt to highlight the inundation of information of a 2019 digital space, the insidious effects of semiocapitalism, and the seemingly futile nature of the consumer/digester/producer's search for truth and meaning, I simultaneously archive digital artifacts of our time for future reference. With "maximum effort, [and] minimal results", I share my exploration of the digital unknown through exhaustive data collection, questioning, curiosity, contradiction, confusion, and admiration for the absurd.

P.1

Creating this book is an active and passive process of consuming, digesting, and producing. Viewing this book is an ac-

tive and passive process of consuming, digesting, and producing.

This book is within your hands and your hands only; it is limited to your immediate vicinity. Converse with it.

This book is neither fictitious nor non-fictitious. This book is passive and active. This book is fast and slow. This book is linear and nonlinear. This book is yours and simultaneously mine.

Question the contents. Accept the contents. Where do they meet?

See chaos. See structure. How does this create and shift meaning?

See contradiction. See patterns. Are they really there?

Be skeptical. Be optimistic. Is neutrality possible?

Write in this book. Circle things. Strike through things. Draw a penis. Leave a secret message. What does this say about you, about me?

Ask “why?” Answer “why not?” Repeat. “Why, Stefanie?” Why Not?!

Engage with this book as deeply or as shallowly as you’d like to. Something will change.

Reflect on your changed state, understand your level of engagement. What frustrates you, excites you?

P PREFACE

P.12-15

P

P.13

What/how you and I consume inherently affects/depends on what you and I digest and produce. What/how you and I digest inherently affects/depends on what you and I consume and produce. What/how you and I produce inherently affects/depends on what you and I consume and digest.

P.14

By making this book, I am agreeing to think twice about what/how I presently consume, digest, produce and what/how I choose to proceed to consume, digest, produce in the future.

P.15

By reading this book, you are agreeing to think twice about what/how you presently consume, digest, produce, and what/how you choose to proceed to consume, digest, produce in the future.

P.12

Engaging with this book is an exchange, a conversation. You and I both are authors.

Chapter 1 of 3:  
An Archive of  
Quotations on  
American Con-  
sumption Habits

C1–3

C1

C1.0

Within *Chapter 1 of 3: An Archive of Quotations on American Consumption Habits*, I archived 100 quotations from online articles of market research/data centers, news platforms, critical thinkers, technology companies, and online business magazines. Synonymously, I archived 100 quotations from researchers, reporters, critics, proponents, and participants who, with their own inherent biases, are publishing information and opinions on the nature of consumption. Some are actively participating in encouraging or discouraging consumption, others engage more passively with statistics, but all are participants in the dialogue.

26

C1.0

As a singular individual collecting these quotations, the data set is inherently biased, but nonetheless archives existing articles and information that may affirm and/or contradict one another. I too am a participant of the dialogue. The order of the quotations is randomized. Names of the organization, business, person, or center publishing the exact quotation are included. The exact link where the original quotation was pulled is also provided for your own curiosity and further exploration.

27

In this following chapter, I have highlighted words from these curated quotations from a place of intrigue, absurdity, and questioning. As a whole, the chapter becomes a cross section of the internet’s content without the noise of advertisements, varying typefaces, stock images, vector based illustrations.

C1.0

I urge you to look at not only the content of the sentence, but the language that frames the information, the publishers they came from, and the time they were written. Who’s saying this? Who’s reading this? What is the incentive for publishing this? The incentive for reading this? How is the viewer’s mind primed to look at this article in conjunction with these words? What is born from this shared knowledge? What will be?

What else is it that you take away from this information that I have not already explained? What are my biases and inconsistencies as the producer? What are your biases and inconsistencies as the consumer? What does this exchange mean?

C1	C1.1	“Millions of companies and organizations around the world have activated the Facebook pixel on their websites. The Facebook pixel records the activity of Facebook users on these websites and passes this data back to Facebook. This information then allows the companies and organizations who have activated the pixel to better target advertising to their website users who also use the Facebook platform.” (Pew Research Center, 01.16.19, <a href="https://www.pewinternet.org/2019/01/16/facebook-algorithms-and-personal-data/">https://www.pewinternet.org/2019/01/16/facebook-algorithms-and-personal-data/</a> )	C CONSUME  1 QUOTES  28
	C1.2	“consumers say they are getting much of what they want but are frustrated by the complexity and effort to get it. They want the ability to customize their media experience with à la carte options while reducing the friction of too many subscriptions to pay for and manage, too many ads, and the looming threat of their data being compromised or misused” (Deloitte Insights, 03.19.19, <a href="https://www2.deloitte.com/insights/us/en/industry/technology/digital-media-trends-consumption-habits-survey/summary.html">https://www2.deloitte.com/insights/us/en/industry/technology/digital-media-trends-consumption-habits-survey/summary.html</a> )	
	C1.3	“In this puzzle of a marketplace, who will win? We believe companies that are best able to reduce the friction, making it easier for consumers to have it their way, will be most amply rewarded.” (Deloitte Insights, 03.19.19, <a href="https://www2.deloitte.com/insights/us/en/industry/technology/digital-media-trends-consumption-habits-survey/summary.html">https://www2.deloitte.com/insights/us/en/industry/technology/digital-media-trends-consumption-habits-survey/summary.html</a> )	
	C1.4	“The Center’s representative sample of American Facebook users finds that 88% say they are assigned categories in this system, while 11% say that after they are directed to their ad preferences page they get a message saying, ‘You have no behaviors’.” (Pew Research Center, 01.16.19, <a href="https://www.pewinternet.org/2019/01/16/facebook-algorithms-and-personal-data/">https://www.pewinternet.org/2019/01/16/facebook-algorithms-and-personal-data/</a> )	
			C1.1-4

C1	C1.5	“How Millennials Consume Content (& How to Better Engage Them)” (Search Engine People, 05.24.18, <a href="https://www.searchenginepeople.com/blog/millennials-consume-content-better-engage.html">https://www.searchenginepeople.com/blog/millennials-consume-content-better-engage.html</a> )	C CONSUME  1 QUOTES  29
	C1.6	“Robo-advisers invest based on input from investors followed by the output of algorithms, rather than recommendations of human advisers.” (Investment News, 01.07.19, <a href="https://www.investmentnews.com/article/20190107/BLOG09/190109965/2019-is-the-year-of-the-algorithm-for-the-sec">https://www.investmentnews.com/article/20190107/BLOG09/190109965/2019-is-the-year-of-the-algorithm-for-the-sec</a> )	
	C1.7	“Those readers are premium customers: they are discerning and hard to reach because they have paid to be where they want to consume. Scarcity therefore, is not something to be feared, but something that will increasingly be valued by advertisers.” (Marketing Week, 01.04.19, <a href="https://www.marketingweek.com/2019/01/04/five-trends-media-2019/">https://www.marketingweek.com/2019/01/04/five-trends-media-2019/</a> )	
	C1.8	“American adults spend over 11 hours per day listening to, watching, reading or generally interacting with media.” (Nielsen, 06.31.18, <a href="https://www.nielsen.com/us/en/insights/news/2018/time-flies-us-adults-now-spend-nearly-half-a-day-interacting-with-media.print.html">https://www.nielsen.com/us/en/insights/news/2018/time-flies-us-adults-now-spend-nearly-half-a-day-interacting-with-media.print.html</a> )	
	C1.9	“Global found that people who were served a geo-targeted O2 ad were 67% more likely to go into a store afterwards than those that didn’t hear the ad. This should be exciting for advertisers.” (Marketing Week, 01.04.19, <a href="https://www.marketingweek.com/2019/01/04/five-trends-media-2019/">https://www.marketingweek.com/2019/01/04/five-trends-media-2019/</a> )	C1.5-10
	C1.10	“Digital eye fatigue is faced by millions of Americans every day because of this non-stop screen time...Coo-	

C1 perVision researchers invented Biofinity Energys contact lenses” (New York Post, 08.13.18, <https://nypost.com/2018/08/13/americans-spend-half-their-lives-in-front-of-screens/>)

C1.11 “Overall, nearly nine-in-ten Americans (89%) currently get at least some local news digitally (through news websites, apps or social media) and 41% do so often. Looking separately at websites and apps compared with social media, roughly equal portions often get news from each (26% and 25%, respectively).” (Pew Research Center Journalism and Media, 03.26.19, <https://www.journalism.org/2019/03/26/for-local-news-americans-embrace-digital-but-still-want-strong-community-connection/>)

C1.12 “predicting that U.S. digital ad spend will increase 19.1 percent this year, to \$129.3 billion, while traditional advertising will fall 19 percent, to \$109.5 billion. That means digital will account for 54.2 percent of the total, while traditional will only represent 45.8 percent.” (Tech Crunch, 02.19, <https://techcrunch.com/2019/02/20/emarketer-digital-ad-forecast/>)

C1.13 “Forty-three percent of US adults say they get news on Facebook, followed by 21% on YouTube, and 12% on Twitter. Meanwhile, nearly three-quarters (73%) of Reddit’s users say they get news on the site, followed by 71% of Twitter’s users, and 67% of Facebook users” (Business Insider, 09.12.18, <https://www.businessinsider.com/pew-nielsen-survey-news-consumption-trends-digital-2018-9>)

C1.14 “nearly six-in-ten Americans (58%) think computer programs will always reflect the biases of their designers, while 40% believe it is possible for computer programs to make decisions that are free from human bias.” (Pew Research Center, 02.13.19, <https://www.pewr>

Chapter 2 of 3:  
An Archive  
of Figures on  
American Con-  
sumption Habits

C1–3

C2

C2.0 Within *Chapter 2 of 3: An Archive of Figures on American Consumption Habits*, I archived 50 figures of data visualization on media consumption pulled from market research/data centers, news platforms, technology companies, and online business magazines. Synonymously, Synonymously, I archived 50 quotations from researchers, reporters, critics, proponents, and participants who, with their own inherent biases, are publishing information and opinions on the nature of consumption. Some are actively leading in original research, others regurgitate this information

from the original source, but all are participants in the dialogue. As a singular individual collecting these figures, the data set is inherently biased, but nonetheless archives existing articles and information that may affirm and/or contradict one another. I too am a participant of the dialogue. The order of the figures is randomized. Names of the organization, business, person, or center publishing the exact quotation are included. The exact link where the original quotation was pulled is also provided for your own curiosity and further exploration.

In this following chapter, I have highlighted the links of these curated figures. As a whole, the chapter becomes a cross section of the internet's content without the noise of advertisements, distracting titles, persuasive words, stock images, vector based illustrations. I urge you to look at not only the statistics, but the language that frames the information, the publishers they came from, and the time they were published. Who's saying this? Who's reading this? What is the incentive for publishing this? The incentive for reading this? How is the view-

er's mind primed to look at this article in conjunction with this figure? What is born from this shared knowledge? What will be? What else is it that you take away from this information that I have not already explained? What are my biases and inconsistencies as the producer? What are your biases and inconsistencies as the consumer? What does this exchange mean?

Chapter 3 of 3:  
An Archive  
of Images on  
American Con-  
sumption Habits.

C1–3

C3

C3.0

Within *Chapter 3 of 3: An Archive of Images on American Consumption Habits*, I archived 50 images acting as visual aids to articles on media consumption pulled from market research/data centers, news platforms, technology companies, and online business magazines. Synonymously, I archived 50 images from researchers, reporters, critics, proponents, and participants who, with their own inherent biases, are publishing information and opinions on the nature of consumption. Some images are stock images, some are vector based illustrations, others are candid images, but all act as learning reinforcement for the assertions made in their respective articles that are participants in the dialogue.

84

C3.0

As a singular individual collecting these images, the data set is inherently biased, but nonetheless archives existing articles and information that may affirm and/or contradict one another. I too am a participant of the dialogue. The order of the images is randomized. Names of the organization, business, person, or center publishing the exact image are included. The exact link where the original quotation was pulled is also provided for your own cu-

85

riosity and further exploration.

In this following chapter, I have highlighted the links of these curated images. As a whole, the chapter becomes a cross section of the internet’s content without the noise of advertisements, distracting titles, persuasive words, stock images, vector based illustrations.

C3.0

I urge you to look at not only the image, but the overlaid words, the people within the image, the article the image supports, the publishers the image comes from, the time they were published. Who’s curating this? Who’s looking at this image this? What is the incentive for using this image? The incentive for clicking on this image? How is the viewer’s mind primed to look at this article in conjunction with this image? What is born from this shared knowledge? What will be?

What else is it that you take away from this information that I have not already explained? What are my biases and inconsistencies as the producer? What are your biases and inconsistencies as the consumer? What does this exchange mean?

Chapter 1 of 3:  
An Archive of  
Quotations on  
American Di-  
gestion Habits

D1–3

D1

D1.0

Within *Chapter 1 of 3: An Archive of Quotations on American Digestion Habits*, I archived 100 quotations from online articles of market research/data centers, news platforms, critical thinkers, technology companies, and online business magazines. Synonymously, I archived 100 quotations from researchers, reporters, critics, proponents, and participants who, with their own inherent biases, are publishing information and opinions on the nature of digestion. Some are actively participating in encouraging or discouraging digestion, others engage more passively with statistics, but all are participants in the dialogue.

114

D1.0

As a singular individual collecting these quotations, the data set is inherently biased, but nonetheless archives existing articles and information that may affirm and/or contradict one another. I too am a participant of the dialogue. The order of the quotations is randomized. Names of the organization, business, person, or center publishing the exact quotation are included. The exact link where the original quotation was pulled is also provided for your own curiosity and further exploration.

115

In this following chapter, I have highlighted words from these curated quotations from a place of intrigue, absurdity, and questioning. As a whole, the chapter becomes a cross section of the internet's content without the noise of advertisements, varying typefaces, stock images, vector based illustrations.

D1.0

I urge you to look at not only the content of the sentence, but the language that frames the information, the publishers they came from, and the time they were written. Who's saying this? Who's reading this? What is the incentive for publishing this? The incentive for reading this? How is the viewer's mind primed to look at this article in conjunction with these words? What is born from this shared knowledge? What will be?

What else is it that you take away from this information that I have not already explained? What are my biases and inconsistencies as the producer? What are your biases and inconsistencies as the consumer? What does this exchange mean?

D1 D1.1 “Faster thinking can enhance skills critical to success such as planning, goal setting, problem solving, and the ability to stay focused on tasks.” (Lifehack, 10.16.18, <https://www.lifehack.org/articles/productivity/8-ways-train-your-brain-learn-faster-and-remember-more.html>)

D1.2 “Where does morality come from? There are two obvious answers to this question: nature or nurture. If you pick nature, then you’re a nativist. You believe that moral knowledge is native in our minds. It comes preloaded, perhaps in our God-inscribed hearts (as the Bible says), or in our evolved moral emotions (as Darwin argued). 2 But if you believe that moral knowledge comes from nurture, then you are an empiricist.” (The Righteous Mind: Why Good People Are Divided by Politics and Religion, 2012, [https://www.ndavidhubbardlmhc.com/uploads/8/9/3/1/8931162/haidt\\_-\\_the\\_righteous\\_mind.pdf](https://www.ndavidhubbardlmhc.com/uploads/8/9/3/1/8931162/haidt_-_the_righteous_mind.pdf))

D1.3 “The Innate Knowledge Thesis: We have knowledge of some truths in a particular subject area, S, as part of our rational nature.” (Stanford Encyclopedia of Philosophy, 07.06.17, <https://plato.stanford.edu/entries/rationalism-empiricism/#Rati>)

D1.4 “Behavioral theories suggest that human decision-makers seek as much information as possible in order to make an informed decision” (Chair for Information Systems Research, University of Freiburg, Platz der Alten Synagoge, 04.18.17, <https://arxiv.org/pdf/1704.05356.pdf>)

D1.5 “non-informative wording has a significant effect on human information processing of financial news” (Thirty Seventh International Conference on Information Systems, 2016, <https://aisel.aisnet.org/cgi/viewcontent.cgi?article=1019&context=icis2016>)

D DIGEST

1 QUOTES

116

D1.1-5

D DIGEST

1 QUOTES

117

D1.6-10

D1 D1.6 “A logical fallacy stems from an error in a logical argument, while a cognitive bias is rooted in thought processing errors often arising from problems with memory, attention, attribution, and other mental mistakes.” (verywellmind, 05.07.19, <https://www.verywellmind.com/what-is-a-cognitive-bias-2794963>)

D1.7 “Slow Media ask for confidence and take their time to be credible. Behind Slow Media are real people. And you can feel that.” (The Slow Media Manifesto, 01.02.10, <http://en.slow-media.net/manifesto>)

D1.8 “The Indispensability of Reason Thesis: The knowledge we gain in [subject area], S, by intuition and deduction, as well as the ideas and instances of knowledge in S that are innate to us, could not have been gained by us through sense experience.” (Stanford Encyclopedia of Philosophy, 07.06.17, <https://plato.stanford.edu/entries/rationalism-empiricism/#Rati>)

D1.9 “Information processing starts with input from the sensory organs, which transform physical stimuli such as touch, heat, sound waves, or photons of light into electrochemical signals. The sensory information is repeatedly transformed by the algorithms of the brain in both bottom-up and top-down processing.” (teAchnology, [www.teach-nology.com/teachers/methods/info\\_processing/](http://www.teach-nology.com/teachers/methods/info_processing/))

D1.10 “Heuristic #16: OVERLOOKING STATISTICS. When given purely statistical data we generally make accurate inferences. But when given statistical data and an individual story that explains things we tend to go with the story rather than statistics. We favor stories with explanatory power over mere data.” (Erik Reads, Thinking Fast and Slow, 2001, <https://erikreads.files.wordpress.com/2014/04/thinking-fast-and-slow-book-summary.pdf>)

D1 D1.11 "Processing speed is defined as the time it takes your brain to take in new information, reach some judgment on it, and then formulate a response. (11) This input can be visual, auditory, or from any of your other senses. For most people, the efficiency and accuracy of thought, rather than speed, are the limiting factors." (Be Brain Fit, 04.26.19, bebrainfit.com/think-faster/)

D1.12 "Changing the way you practice a new motor skill can help you master it faster" (Fast Company, 08.30.16, https://www.fastcompany.com/3063173/six-brain-hacks-to-learn-anything-faster)

D1.13 "These technologies have made it possible, for the first time in human history, for there to be an actual science of the unconscious." (Subliminal, How Your Unconscious Mind Rules Your Behavior, https://www.npr.org/books/titles/175562553/subliminal-how-your-unconscious-mind-rules-your-behavior#excerpt)

D1.14 "Memorize efficiently to lock in information fast." (wikiHow, 03.29.19, https://www.wikihow.com/Learn-Faster)

D1.15 "Davis's Technology Acceptance Model (TAM) provides a valid and reliable measure that predicts the acceptance or adoption of new technologies by end-users" (Davis, 1989; Davis, Bagozzi, & Warshaw, 1989). It also is a commonly used model to measure technology acceptance (King & He, 2006)" (Consumer health informatics research resource, https://chirr.nlm.nih.gov/tam.php)

D1 D1.17 "The division of labor between System 1 and System 2 is highly efficient: it minimizes effort and optimizes performance." (Thinking Fast and Slow, 2001, http://sysengr.engr.arizona.edu/OLLI/lousyDecisionMaking/KahnemanThinkingFast&Slow.pdf)

D1.18 "The defining feature of System 2, in this story, is that its operations are effortful, and one of its main characteristics is laziness, a reluctance to invest more effort than is strictly necessary. As a consequence, the thoughts and actions that System 2 believes it has chosen are often guided by the figure at the center of the story, System 1. However, there are vital tasks that only System 2 can perform because they require effort and acts of self-control in which the intuitions and impulses of System 1 are overcome." (Thinking Fast and Slow, 2001, http://sysengr.engr.arizona.edu/OLLI/lousyDecisionMaking/KahnemanThinkingFast&Slow.pdf)

D1.19 "Cognitive psychology believes that internal mental states such as desire, belief, ideas, and motivation exist. Memory structures are considered responsible for the way in which information is perceived and processed, as also how it is stored, remembered, and disremembered" (PsycholoGenie, 05.07.18, https://psychologenie.com/information-processing-theory)

D1.20 "Endless access to new information also easily overloads our working memory. When we reach cognitive overload, our ability to transfer learning to long-term memory significantly deteriorates...I've known all of this for a long time. I started writing about it 20 years ago. I teach it to clients every day. I just never really believed it could become so true of me." (The New York Times, 11.28.15, https://www.nytimes.com/2015/11/29/opinion/sunday/addicted-to-distraction.html)

D1	D1.21	“Similar to profiling or stereotyping, ‘representativeness’ is the intuitive leap to make judgments based on how similar something is to something we like without taking into consideration other factors: probability (likelihood), statistics (base rate), or sampling sizes” (Erik Reads, Thinking Fast and Slow, 2001, <a href="https://erikreads.files.wordpress.com/2014/04/thinking-fast-and-slow-book-summary.pdf">https://erikreads.files.wordpress.com/2014/04/thinking-fast-and-slow-book-summary.pdf</a> )	D DIGEST
	D1.22	“The information processing theory is an approach to the cognitive development of a human being, which deals with the study and the analysis of the sequence of events that occur in a person’s mind while receiving some new piece of information.” ( <a href="https://psychologie.com/information-processing-theory">https://psychologie.com/information-processing-theory</a> )	1 QUOTES
	D1.23	“The efficiency of human memory recall is astounding. Most of what we remember is by direct retrieval, where items of information are linked directly a question or cue, rather than by the kind of sequential scan a computer might use” (The Human Memory, <a href="http://www.human-memory.net/processes_storage.html">www.human-memory.net/processes_storage.html</a> )	120
	D1.24	“Your preference in politicians, the amount you tip your waiter—all judgments and perceptions reflect the workings of our mind on two levels: the conscious, of which we are aware, and the unconscious, which is hidden from us. The latter has long been the subject of speculation, but over the past two decades researchers have developed remarkable new tools for probing the hidden, or subliminal, workings of the mind. The result of this explosion of research is a new science of the unconscious and a sea change in our understanding of how the subliminal mind affects the way we live.” (Subliminal: How your unconscious mind rules your behavior, 2016, <a href="https://psycnet.apa.org/record/2012-13142-000">https://psycnet.apa.org/record/2012-13142-000</a> )	D1.21–24

D1	D1.25	“Self-related process is an advanced cognition process; studies on the self-related process have attracted many psychologists from the 1970s (Rogers et al., 1977). Northoff et al. (2006) collectively defined self-related, self-relevant, and self-reference processes as self-reference processing, and these concepts emphasized the correlation degree of stimuli and self. Self-reference can facilitate recording and refining stimuli related to one’s self-concept better than those of others (Rogers et al., 1977; Zhu, 2004; Kim, 2012).” (frontiers in Psychology, 12.18.18, <a href="https://www.frontiersin.org/articles/10.3389/fpsyg.2018.02597/full">https://www.frontiersin.org/articles/10.3389/fpsyg.2018.02597/full</a> )	D DIGEST
	D1.26	“An eLearning Course Can be Prepared to Suit the Audience's Learning Style & Preferences. There are three ways of learning something: Visually - Understanding information when seeing images, diagrams, charts, demonstrations, etc. Aurally - Understanding information when it is explained in detail through active listening. Tactilely and kinesthetically - Understanding information when the student tries it himself, hands-on fashion.” (SH!FT, DISRUPTIVE ELEARNING, 05.22.19, <a href="https://www.shiftelearning.com/blog/how-people-process-information-elearning">https://www.shiftelearning.com/blog/how-people-process-information-elearning</a> )	1 QUOTES
	D1.27	“Our brains are comprised of two characters, one that thinks fast, System 1, and one that thinks slow, System 2. System 1 operates automatically, intuitively, involuntary, and effortlessly—like when we drive, read an angry facial expression, or recall our age. System 2 requires slowing down, deliberating, solving problems, reasoning, computing, focusing, concentrating, considering other data, and not jumping to quick conclusions— like when we calculate a math problem, choose where to invest money, or fill out a complicated form. These two systems often conflict with one another.” (Erik Reads, Thinking Fast and Slow, 2001, <a href="https://erikreads.files.wordpress.com/2014/04/thinking-fast-and-slow-book-summary.pdf">https://erikreads.files.wordpress.com/2014/04/thinking-fast-and-slow-book-summary.pdf</a> )	121
			D1.25–27

# D1

D1.28 “Methodic doubt is a systematic process of withholding assent regarding the truth or falsehood of all one’s beliefs until they have been demonstrated or rationally proven to be true or false..Through the use of methodic doubt Descartes attempted to demonstrate philosophical truths, which he thought could defeat the most radical doubt or skepticism.” (New World Encyclopedia, 09.10.18, [www.newworldencyclopedia.org/entry/Methodic\\_doubt](http://www.newworldencyclopedia.org/entry/Methodic_doubt))

D1.29 “It states that information is stored simultaneously in different areas of the brain, and connected as a network. The amount of connections a single piece of information has will affect the ease of retrieval.” (Learning Theories, 2019, <https://www.learning-theories.com/information-processing-theory.html>)

D1.30 “Neglecting negations can substantially impair accuracy when studying human information processing; for example, it is common ‘to see the framing of negative news using positive words’ To avoid false attributions, one must identify and predict negated text fragments precisely” (Chair for Information Systems Research, University of Freiburg, Platz der Alten Synagoge, 04.18.17, <https://arxiv.org/pdf/1704.05356.pdf>)

D1.31 “Davis’s (1989) original TAM predicts acceptance based on the end-user’s perceived usefulness (PU) and perceived ease of use (PEOU) of the technology for a specific purpose. Davis applied the model to work settings, and defined PU as ‘the degree to which a person believes that using a particular system would enhance his or her job performance.’ (Davis, 1989, p. 320). In non-work settings, the goal becomes personal objectives instead of enhancing job performance.” (Consumer health informatics research resource, <https://chirr.nlm.nih.gov/tam.php>)

D1 D1.76 “Availability Heuristic: This is placing greater value on information that comes to your mind quickly... Halo Effect: Your overall impression of a person influences how you feel and think about his or her character... Attentional Bias: This is the tendency to pay attention to some things while simultaneously ignoring others... Actor-Observer Bias: This is the tendency to attribute your own actions to external causes while attributing other people's behaviors to internal causes... Functional Fixedness: This is the tendency to see objects as only working in a particular way... Anchoring Bias: This is the tendency to rely too heavily on the very first piece of information you learn...” (verywellmind, 05.07.19, <https://www.verywellmind.com/what-is-a-cognitive-bias-2794963>)

D1.77 “Because thinking slow takes work we are prone to think fast, the path of least resistance. ‘Laziness is built deep into our nature,’ (page 35).” (Erik Reads, Thinking Fast and Slow, 2001, <https://erikreads.files.wordpress.com/2014/04/thinking-fast-and-slow-book-summary.pdf>)

D1.78 “Slow Media focus on quality both in production and in reception of media content: Craftsmanship in cultural studies such as source criticism, classification and evaluation of sources of information are gaining importance with the increasing availability of information.” (The Slow Media Manifesto, 01.02.10, <http://en.slow-media.net/manifesto>)

D1.79 “Whether a person is a visual, auditory or kinesthetic learner, the brain prefers information in a hierarchical fashion. A disorganized or illogical course structure is a hindrance to learning and wastes valuable production time.” (SHIFT, DISRUPTIVE ELEARNING, 05.22.19, <https://www.shiftelearning.com/blog/how-people-process-information-elearning>)

D DIGEST 1 QUOTES 137 D1.76-79

D1 D1.80 “memories eventually must be retrieved from storage. Remembering past events is not like watching a recorded video. It is, rather, a process of reconstructing what may have happened based on the details the brain chose to store and was able to recall. Recall is triggered by a retrieval cue, an environmental stimulus that prompts the brain to retrieve the memory. Evidence shows that the better the retrieval cue, the higher the chance of recalling the memory. It is important to note that the retrieval cue can also make a person reconstruct a memory improperly. Memory distortions can be produced in various ways, including varying the wording of a question.” (teAchnology, [www.teach-nology.com/teachers/methods/info\\_processing/](http://www.teach-nology.com/teachers/methods/info_processing/))

D1.81 “the dissemination of information and sentiment has been empirically tested in social networks [31], revealing that emotionally-charged tweets are retweeted more often and faster” (Chair for Information Systems Research, University of Freiburg, Platz der Alten Synagoge, 04.18.17, <https://arxiv.org/pdf/1704.05356.pdf>)

D1.82 “manipulating the tone of news without distorting its content influences the stock market reaction of investors” (Thirty Seventh International Conference on Information Systems, 2016, <https://aisel.aisnet.org/cgi/viewcontent.cgi?article=1019&context=icis2016>)

D1.83 “With the complete neuropsychological assessment, you will have the ability to efficiently gather reliable results about the user's cognitive processing speed. CogniFit is able to precisely measure the user's general cognitive level with our specialized Cognitive Assessment Battery (CAB), which is comprised of a series of cognitive tests designed to assess processing speed.” (Cognifit, <https://www.cognifit.com/science/cognitive-skills/processing-speed>)

Chapter 2 of 3:  
An Archive  
of Figures on  
American Di-  
gestion Habits

D1–3

D2

D2.0      Within *Chapter 2 of 3: An Archive of Figures on American Digestion Habits*, I archived 50 figures of data visualization on media digestion pulled from market research/data centers, news platforms, technology companies, and online business magazines. Synonymously, Synonymously, I archived 50 quotations from researchers, reporters, critics, proponents, and participants who, with their own inherent biases, are publishing information and opinions on the nature of digestion. Some are actively leading in original research, others regurgitate this information from the original source, but all are participants in the dialogue. 150

As a singular individual collecting these figures, the data set is inherently biased, but nonetheless archives existing articles and information that may affirm and/or contradict one another. I too am a participant of the dialogue. The order of the figures is randomized. Names of the organization, business, person, or center publishing the exact quotation are included. The exact link where the original quotation was pulled is also provided for your own curiosity and further exploration.

151      In this following chapter, I have highlighted the links of these curated figures. As a whole, the chapter becomes a cross section of the internet's content without the noise of advertisements, distracting titles, persuasive words, stock images, vector based illustrations.

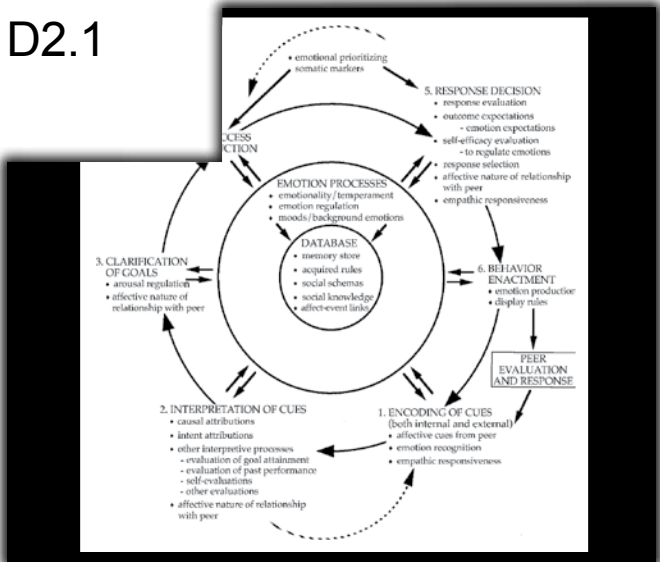

I urge you to look at not only the statistics, but the language that frames the information, the publishers they came from, and the time they were published. Who's saying this? Who's reading this? What is the incentive for publishing this? The incentive for reading this? How is the viewer's mind primed to look at this article in conjunction with this figure? What is born from this shared knowledge? What will be?

What else is it that you take away from this information that I have not already explained? What are my biases and inconsistencies as the producer? What are your biases and inconsistencies as the consumer? What does this exchange mean?

# D3

D DIGEST

3 IMAGES

D3.0      Within *Chapter 3 of 3: An Archive of Images on American Digestion Habits*, I archived 50 images acting as visual aids to articles on media digestion pulled from market research/data centers, news platforms, technology companies, and online business magazines. Synonymously, I archived 50 images from researchers, reporters, critics, proponents, and participants who, with their own inherent biases, are publishing information and opinions on the nature of digestion. Some images are stock images, some are vector based illustrations, others are candid images, but all act as learning reinforcement for the assertions made in their respective articles that are participants in the dialogue.

As a singular individual collecting these images, the data set is inherently biased, but nonetheless archives existing articles and information that may affirm and/or contradict one another. I too am a participant of the dialogue. The order of the images is randomized. Names of the organization, business, person, or center publishing the exact image are included. The exact link where the original quotation was pulled is also provided for your own cu-

172

173      riosity and further exploration.

In this following chapter, I have highlighted the links of these curated images. As a whole, the chapter becomes a cross section of the internet's content without the noise of advertisements, distracting titles, persuasive words, stock images, vector based illustrations.

I urge you to look at not only the image, but the overlaid words, the people within the image, the article the image supports, the publishers the image comes from, the time they were published. Who's curating this? Who's looking at this image this? What is the incentive for using this image? The incentive for clicking on this image? How is the viewer's mind primed to look at this article in conjunction with this image? What is born from this shared knowledge? What will be?

What else is it that you take away from this information that I have not already explained? What are my biases and inconsistencies as the producer? What are your biases and inconsistencies as the consumer? What does this exchange mean?

Chapter 1 of 3:  
An Archive of  
Quotations on  
American Pro-  
duction Habits

P1–3

P1

P1.0      Within *Chapter 1 of 3: An Archive of Quotations on American Production Habits*, I archived 100 quotations from online articles of market research/data centers, news platforms, critical thinkers, technology companies, and online business magazines. Synonymously, I archived 100 quotations from researchers, reporters, critics, proponents, and participants who, with their own inherent biases, are publishing information and opinions on the nature of production. Some are actively participating in encouraging or discouraging production, others engage more passively with statistics, but all are participants in the dialogue. 202

As a singular individual collecting these quotations, the data set is inherently biased, but nonetheless archives existing articles and information that may affirm and/or contradict one another. I too am a participant of the dialogue. The order of the quotations is randomized. Names of the organization, business, person, or center publishing the exact quotation are included. The exact link where the original quotation was pulled is also provided for your own curiosity and further exploration.

P1.0

203      In this following chapter, I have highlighted words from these curated quotations from a place of intrigue, absurdity, and questioning. As a whole, the chapter becomes a cross section of the internet's content without the noise of advertisements, varying typefaces, stock images, vector based illustrations.

I urge you to look at not only the content of the sentence, but the language that frames the information, the publishers they came from, and the time they were written. Who's saying this? Who's reading this? What is the incentive for publishing this? The incentive for reading this? How is the viewer's mind primed to look at this article in conjunction with these words? What is born from this shared knowledge? What will be?

What else is it that you take away from this information that I have not already explained? What are my biases and inconsistencies as the producer? What are your biases and inconsistencies as the consumer? What does this exchange mean?

P1.0

P1	P1.1	“Combined advertiser expenditures for the evening broadcast news programs, ABC’s World News Tonight, CBS Evening News and NBC Nightly News, were \$552 million, roughly the same as 2016, according to estimates from Kantar Media.” (Journalism & Media Pew Research Center, 07.25.18, <a href="https://www.journalism.org/fact-sheet/network-news/">https://www.journalism.org/fact-sheet/network-news/</a> )	P PRODUCE
	P1.2	“The majority of content created by brands is having little or no impact on business results or people’s lives, according to Havas’ latest ‘Meaningful Brands’ study.” (Marketing Week, 02.01.18, <a href="https://www.marketingweek.com/2017/02/01/content-havas-meaningful-brands/">https://www.marketingweek.com/2017/02/01/content-havas-meaningful-brands/</a> )	1 QUOTES
	P1.3	“Art – like all cultural production – has a complicated status online. It becomes ‘content’, that catchall phrase for the stuff that advertising is sold around. And that is also the condition in which art is viewed: as part of a mass. An emblematic example of the accumulation of imagery on the web is 4chan.” (The White Review, 04.16, <a href="http://www.thewhitereview.org/feature/scroll-skim-stare/">http://www.thewhitereview.org/feature/scroll-skim-stare/</a> )	204
	P1.4	“Without an in-depth understanding of your target market, your content will likely be less effective in capturing their attention. Learn about your customers. Know them inside and out. Understand what makes them tick. Then, use this information to create relevant content that will effectively engage your target market.” (jeffbullas.com WIN AT BUSINESS AND LIFE IN A DIGITAL WORLD, <a href="https://www.jeffbullas.com/create-better-content/">https://www.jeffbullas.com/create-better-content/</a> )	
	P1.5	“As mentioned before, the sequence of revisions to an article is not a good proxy for content production namely because of its noisy nature <sup>18</sup> .” (Scientific Reports, 2015, <a href="https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4437024/">https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4437024/</a> )	P1.1–5

P1	P1.6	“Swart, Peters and Broersma (2017, p. 186) define engagement as the ‘specific ways and means by which people connect [to public life] through news.’ The broadest possible definition of audience engagement would be to include all audience responses to media ‘beyond the level of attention’”(Cogitatio Press, 2019, <a href="https://www.cogitatiopress.com/mediaandcommunication/article/view/1758">https://www.cogitatiopress.com/mediaandcommunication/article/view/1758</a> )	P PRODUCE
	P1.7	“The growth in data and the way it can be used is also changing the way business is being done and the services that organizations can offer due to an enhanced ability to produce, capture, and understand data.” (Micro Focus, 10.10.17, <a href="https://blog.microfocus.com/how-much-data-is-created-on-the-internet-each-day/">https://blog.microfocus.com/how-much-data-is-created-on-the-internet-each-day/</a> )	1 QUOTES
	P1.8	“Though not technically a part of the content production process, before putting processes in place for your day-to-day tactical efforts, you have to have clear strategic goals in mind.” (Target Marketing, 02.12.18, <a href="https://www.targetmarketingmag.com/post/content-marketing-produce-better-content-faster/all/">https://www.targetmarketingmag.com/post/content-marketing-produce-better-content-faster/all/</a> )	205
	P1.9	“Mobile advertising revenue’s rapid growth continued in 2017, increasing from \$47 billion in 2016 to \$61 billion. Although desktop advertising revenue also saw an increase in 2017, mobile advertising revenue comprised two thirds of all digital advertising revenue.” (Journalism & Media Pew Research Center, 06.06.18, <a href="https://www.journalism.org/fact-sheet/digital-news/">https://www.journalism.org/fact-sheet/digital-news/</a> )	
	P1.10	“the entire digital universe is expected to reach 44 zetta-bytes by 2020. If this number is correct, it will mean there are 40 times more bytes than there are stars in the observable universe.” (Visual Capitalist, 04.15.19, <a href="https://www.visualcapitalist.com/how-much-data-is-generated-each-day/">https://www.visualcapitalist.com/how-much-data-is-generated-each-day/</a> )	P1.6–10

P1 P1.11 “some incredible stats for the volume of communication we send out every minute: Every minute there are 103,447,520 spam emails sent” (Forbes, 05.21.18, <https://www.forbes.com/sites/bernardmarr/2018/05/21/how-much-data-do-we-create-every-day-the-mind-blowing-stats-everyone-should-read/#45558dc960ba>)

P1.12 “More than 4 million hours of content uploaded to Youtube every day, with users watching 5.97 billion hours of Youtube videos each day” (Micro Focus, 10.10.17, <https://blog.microfocus.com/how-much-data-is-created-on-the-internet-each-day/>)

P1.13 “some incredible stats for the volume of communication we send out every minute: Spotify adds 13 new songs” (Forbes, 05.21.18, <https://www.forbes.com/sites/bernardmarr/2018/05/21/how-much-data-do-we-create-every-day-the-mind-blowing-stats-everyone-should-read/#45558dc960ba>)

P1.14 “This tendency responds to attention economies online – viewers scroll, skim, allow video autoplay. One of the few origins of the dominance of text in the early internet – search engine optimisation – is losing traction with the development of image-recognition software. The result is an ecology of soundbites, of the quick-to-consume, a publishing environment that seems so inherent to the internet it is rarely challenged.” (The White Review, 04.16, <http://www.thewhitereview.org/feature/scroll-skim-stare/>)

P1.15 “these are numbers generated every minute of the day: Instagram users post 46,740 photos” (Forbes, 05.21.18, <https://www.forbes.com/sites/bernardmarr/2018/05/21/how-much-data-do-we-create-every-day-the-mind-blowing-stats-everyone-should-read/#45558dc960ba>)

P1.90–93

P1.91 “the dissemination of news is very fast. On average,  
it takes two hours for an information published by a  
media outlet to be published on the website of an-  
other outlet; but less than 45 minutes in half of the cases, of  
which less than 5 minutes in 25% of the cases. This very high  
225 reactivity comes with the use of copy-and-paste, however. Ac-  
cording to our lower bound estimation, half of online informa-  
tion production is copy-and-paste. Most outlets simply echoe  
others work without adding original reporting.” (NET Institute,  
2015, [http://www.netinst.org/Cage\\_Herve\\_Viaud\\_15-05.pdf](http://www.netinst.org/Cage_Herve_Viaud_15-05.pdf))

P1.92 “On average, Google now processes more than  
40,000 searches EVERY second (3.5 billion  
searches per day)” (Forbes, <https://www.forbes.com/sites/bernardmarr/2018/05/21/how-much-data-do-we-create-every-day-the-mind-blowing-stats-everyone-should-read/#45558dc960ba>)

P1.93 “Through analysis of a massive dataset on traffic to  
Wikipedia, we find that the production of new knowl-  
edge is associated to significant shifts of collective at-  
tention, which we take as proxy for its demand.” (NET Institute,  
2015, [http://www.netinst.org/Cage\\_Herve\\_Viaud\\_15-05.pdf](http://www.netinst.org/Cage_Herve_Viaud_15-05.pdf))

P1

P1.94 “as of February 2016, 486 Instagram photos are uploaded every second. That’s over 40 million images a day. And that’s just Instagram, just one source of images uploaded to the internet. Every two minutes, people upload more photographs to the internet than existed in total just 150 years ago (and this information is correct as of 2014). This proliferation has changed the condition of viewing images today in a way as monumental as the advent of photography or the introduction of illustrated newspapers in the mid-nineteenth century.” (The White Review, 04.2016, <http://www.thewhitereview.org/feature/scroll-skim-stare/>)

P1.95 “10 of the Best Social Media Monitoring Tools for Every Business” (MarketingProfs, 05.08.19, <https://www.marketingprofs.com/articles/2019/41073/10-of-the-best-social-media-monitoring-tools-for-every-business>)

P1.96 “some incredible stats for the volume of communication we send out every minute: There are 990,000 Tinder swipes” (Forbes, 05.21.18, <https://www.forbes.com/sites/bernardmarr/2018/05/21/how-much-data-do-we-create-every-day-the-mind-blowing-stats-everyone-should-read/#45558dc960ba>)

P1.97 “For some, these are just interesting factoids that titillate the mind and can later be brought out to impress friends over a coffee. For marketers, these statistics can help in developing strategies to ensure you are targeting the audience you want to reach in the most effective way.” (Brandwatch, 01.05.19, <https://www.brandwatch.com/blog/facebook-statistics/>)

P1.98 “60% of marketers create at least one piece of content” (NEILPATEL, <https://neilpatel.com/blog/38-content-marketing-stats-that-every-marketer-needs-to-know/>)

Chapter 2 of 3:  
An Archive  
of Figures on  
American Pro-  
duction Habits

P1–3

P2

P2.0      Within *Chapter 2 of 3: An Archive of Figures on American Production Habits*, I archived 50 figures of data visualization on media production pulled from market research/data centers, news platforms, technology companies, and online business magazines. Synonymously, Synonymously, I archived 50 quotations from researchers, reporters, critics, proponents, and participants who, with their own inherent biases, are publishing information and opinions on the nature of production. Some are actively leading in original research, others regurgitate this information from the original source, but all are participants in the dialogue. 234

As a singular individual collecting these figures, the data set is inherently biased, but nonetheless archives existing articles and information that may affirm and/or contradict one another. I too am a participant of the dialogue. The order of the figures is randomized. Names of the organization, business, person, or center publishing the exact quotation are included. The exact link where the original quotation was pulled is also provided for your own curiosity and further exploration.

P2.0

235      In this following chapter, I have highlighted the links of these curated figures. As a whole, the chapter becomes a cross section of the internet's content without the noise of advertisements, distracting titles, persuasive words, stock images, vector based illustrations.

I urge you to look at not only the statistics, but the language that frames the information, the publishers they came from, and the time they were published. Who's saying this? Who's reading this? What is the incentive for publishing this? The incentive for reading this? How is the viewer's mind primed to look at this article in conjunction with this figure? What is born from this shared knowledge? What will be?

What else is it that you take away from this information that I have not already explained? What are my biases and inconsistencies as the producer? What are your biases and inconsistencies as the consumer? What does this exchange mean?

P2.9

## HOW TO VISUALIZE

Your ability to learn how to visualize depends on your ability to find a quiet place, clear your mind and imagine your goals. Follow the 3 simple steps below to start visualizing.

- 1. Find A Quiet Place**

The first step in learning how to visualize is to find a quiet place. You can choose

  - A nice shady tree at the park
  - Your favorite spot in your home
  - Your private office
  - Anywhere peaceful
  - Anywhere you will not be disturbed
- 2. Clear Your Mind**

When preparing for visualization, sit in a position that you can be comfortable for a while.

  - Close your eyes
  - Relax by taking a few deep breaths
  - Continue to focus on your breathing
  - Count down from 20 each breath out
  - Repeat until your mind is clear
- 3. Imagine Your Goals**

Visualize all the details of the final day of your project. Visualize as many details as you can

  - Sights - What Are You Wearing?
  - Sounds - What Do You Hear?
  - People - Who Is Present?
  - Write down your thoughts
  - Create a collage with your ideas

Chapter 3 of 3:  
An Archive  
of Images on  
American Pro-  
duction Habits.

P1–3

P3

P3.0      Within *Chapter 3 of 3: An Archive of Images on American Production Habits*, I archived 50 images acting as visual aids to articles on media production pulled from market research/data centers, news platforms, technology companies, and online business magazines. Synonymously, I archived 50 images from researchers, reporters, critics, proponents, and participants who, with their own inherent biases, are publishing information and opinions on the nature of production. Some images are stock images, some are vector based illustrations, others are candid images, but all act as learning reinforcement for the assertions made in their respective articles that are participants in the dialogue.

As a singular individual collecting these images, the data set is inherently biased, but nonetheless archives existing articles and information that may affirm and/or contradict one another. I too am a participant of the dialogue. The order of the images is randomized. Names of the organization, business, person, or center publishing the exact image are included. The exact link where the original quotation was pulled is also provided for your own cu-

258

P3.0

259      riosity and further exploration.

In this following chapter, I have highlighted the links of these curated images. As a whole, the chapter becomes a cross section of the internet's content without the noise of advertisements, distracting titles, persuasive words, stock images, vector based illustrations.

I urge you to look at not only the image, but the overlaid words, the people within the image, the article the image supports, the publishers the image comes from, the time they were published. Who's curating this? Who's looking at this image this? What is the incentive for using this image? The incentive for clicking on this image? How is the viewer's mind primed to look at this article in conjunction with this image? What is born from this shared knowledge? What will be?

What else is it that you take away from this information that I have not already explained? What are my biases and inconsistencies as the producer? What are your biases and inconsistencies as the consumer? What does this exchange mean?

Postface:  
On the Post  
Engagement  
with This Book

P.0 Book, *Consume Digest Produce: On the Nature of American Consumption/Digestion/Production of Information* is not a research paper. The previous collected data is unfiltered, uncontrolled. The motivating factors of collecting this information can be distilled into two questions.

P.0.1 When the information—whether a quotation, a figure, or an image—is stripped of its context, how does it read, and would the value and interpretation change? Does it become funny, absurd, alarming, confirmatory?

P.0.2 Whether it relates loosely or rigidly to the words “CONSUME”, “DIGEST”, and “PRODUCE”, does the information contribute to a new dialogue and/or build upon the other collected information of all 3 books?

To caveat this, these two questions are not the only determining factors. Pleasure, curiosity, absurdity, and trance all came into play at varying levels that are otherwise immeasurable.

Where the internet functions in a similar fashion—unfiltered and uncontrolled—the work created

282

283 is a balancing act of reflection and hypocrisy. The work complicates and flattens the nature of consumption, digestion, and production in regards to the internet; the “answer” to how we navigate the quickly evolving digital space is non-existent and the conversation is anything but straightforward. Maybe something has changed, or maybe nothing at all.

Thank you for consuming, digesting, and producing with me.

A special thanks to Rebeca Mendez, Tyler Yin, Israel Gutierrez, Dong Hye Kim, and UCLA Design Media Arts.

P

P.1 Closing this book is a re-entrance to the active and passive process of consuming, digesting, and producing.

P.2 By ending this book, what/how I presently consume, digest, produce and what/how I choose to proceed to consume, digest, produce in the future has changed.

P.3 By closing this book, what/how you presently consume, digest, produce and what/how you choose to proceed to consume, digest, produce in the future has changed.
